

## Prevalence And Determinants Of Child Malnutrition In Bangladesh

By Kamalesh Dey

GRIN Verlag Feb 2016, 2016. Taschenbuch. Book Condition: Neu. 210x148x7 mm. This item is printed on demand - Print on Demand Neuware - Master's Thesis from the year 2015 in the subject Medicine - Public Health, , course: MSC IN PUBLIC HEALTH, language: English, abstract: Child malnutrition is the supreme concern of public health department in Bangladesh. Every two pre-school children are malnourished in Bangladesh. However, Bangladesh has achieved Millennium Development Goals (MDGs) 3 in the past years and MDG-4 is on track. Consequently, the rate of child malnutrition has reduced somewhat due to the improvement of both health care practice and policy system in Bangladesh in the period between in 1999 (56%) and in 2014 (43~36.8%). Aim The aim of the review study is to find out the prevalence and determinants of child malnutrition in Bangladesh. In addition, the review study will also help future researcher and health policy maker to modify existing nutrition policy through the various nutritional intervention programs in the community and school level to improve the nutritional status of children in Bangladesh. Methods The review study design conducted through the step-by-step systematic review protocol. The author searched relevant primary studies in numerous databases using Boolean...
